

NETWORK INSTALLATION PROPOSAL

Proposal for installation of computer network at

Network Designer/s:

Dela Cruz, Bryan

Pagaduan, Jet Angelo

San Andres, Jan Rafael

INTRODUCTION

DATUS Company is a full-service IT services provider specializing in network installation, support, and maintenance. Our headquarters are located in T. Santiago St. Viente Reales, Valenzuela City.

Our network engineers, designers, and installers are certified and licensed to install computer networks in small businesses, multi-family residences, and large institutions such as universities and hospitals.

This proposal is valid until January 31, 2025. Should you need to extend your decision past that date, we'll be happy to revisit this document to ensure all pricing and installation schedules are accurate at the time of signing.

PROJECT DESCRIPTION

Example only:

THE CABA Company wishes to move into their new facility located at Maysan, Valenzuela City by March 4, 2025. This facility requires a new computer network installation prior to that date.

THE CABA Company wishes to partner with a qualified vendor to design and install a new computer network at [Client.Address]. This network should be capable of not only supporting [Client.Company]'s current network needs, but should also be able to scale as [Client.Company] continues to grow.

To accomplish these goals, [Sender.Company] proposes the following:

Installation of [Product.Line] products. This complete line of computer network products includes several products which will meet [Client.Company]'s current needs while also allowing for future expansion as network needs evolve.

Specifically, [Sender.Company] recommends installation of the following products:
